Verbal Description

Candelero fragment. 8 chambers, partial chambers visible 2.1 cm in diameter. Chambers are 4.4 cm deep & are really bent in the base, though this does not extend into the base of the Candelero. Boring goes about 1/2 way up the Candelero, but gets grey & light grey - not as much black. Two of the chambers have walls on the exterior & these have holes poked in (.6 cm) from the outside. These holes are about halfway up the Candelero. The top & exterior do not seem to have any slip or decorat.
